Full stack web developer with a passion for learning new technologies. With experience in Ruby on Rails, JavaScript, and React and a background in Tech Support, I discovered web development through a previous QA position and decided to pursue a life in code. I bring strong skills in [team-building and project management] that help [what type of companies] [drive what positive result/impact]. [Other unique anecdote].

TECHNICAL SKILLS   TECHNICAL PROJECTS

- Ruby (on Rails)
- JavaScript
- SQL
- HTML5/ CSS
- Python
- ECMAScript6
- RSpec
- DOM

Property Pals - Github | Live Demo
Property app that will allow tenants and Property managers complete maintenance requests, pay bills, interact with each other via the pPals platform.
+ Created a user authentication so tenants could not log on admin pages without the right access
+ Used Ruby on Rails and RESTful principles to reroute pages to their correct view
+ Used MVC and DRY patterns to provide optimal that could be reused.

Workout CLI- Github | Demo | Refactored OO
Ruby CLI that uses ActiveRecord. Full CRUD implemented. Refactored CLI only uses OO programming without the use of a db.
+ Allows the user to create a new account with password or log back in.
+ Contains checks if correct information is not provided prompting the user to try again.

Calculator App- Live Demo
Developed a simple calculator app that uses Javascript and DOM manipulation.
+ Used Javascript to output the buttons and the containers needed to hold the app
+ Added Bootstrap and CSS to change the look and appearance
+ DOM provides the ability to click on any of the buttons and save for calculations
