- ❖ RSpec
- ❖ DOM
- ❖ RESTful
- ❖ API
- ❖ Git
- ❖ POSTGRESql
- ❖ Bootstrap
- ❖ jQuery
- ❖ Object Oriented Programming
- ❖ Functional Programming
- ❖ Agile Development

TECHNICAL PROJECTS

Property Pals - Github | Live Demo
Property app that will allow tenants and Property managers complete maintenance requests, pay bills, interact with each other via the pPals platform.
Created a user authentication so tenants could not log on admin pages without the right access
- ◎ Used Ruby on Rails and RESTful principles to reroute pages to their correct view
- ◎ Used MVC and DRY patterns to provide optimal code that could be reused.

Flavortown 2033 JS/HTML Game - Github | Demo
Online game developed with Javascript, DOM, and Rails API.
- ◎ Allows the user to start a game with controls to move up and down to avoid obstacles.
- ◎ Uses Rails API to save top scores.

Workout CLI- Github | Demo | Refactored OO
Ruby CLI that uses ActiveRecord. Full CRUD implemented. Refactored CLI only uses OO programming without the use of a db.
- ◎ Allows the user to create a new account with a password or log back in with previous account.

Bulletin Board App- Live Demo
React built bulletin board app allowing you to create, save, edit, and remove notes.
- ◎ Built using React components and methods
- ◎ Styling created using CSS && deployed on Heroku for live demo.

EMPLOYMENT HISTORY

Yardi Systems, Santa Barbara, CA
Technical Account Manager, *08/2015 - 03/2018*
- ◎ Conducted QA for plug-in releases, logged errors, and notified developers of critical issues.
- ◎ Wrote reusable Technical docs for clients and colleagues that saved the company on avg 40 hours of scheduled calls.
- ◎ Led Best Practices project which led to a full overhaul of our internal technical procedures.
- ◎ Implemented Large client Projects with the Payment Processing Infrastructure.

Local Market Launch, Santa Barbara, CA
QA Automation Specialist, *08/2014-04/2015*
- ◎ Wrote, tested, and updated automation scripts with Selenium-Server (Python)
- ◎ Pushed and merged code updates to GitHub using git command line.
- ◎ Monitored file log for bugs which led to creating new platform features.
